

Edysor Chatbot Quote

Based on the call and the WhatsApp message and requirements.

We are focused here on and quoting for points 1 - 4 and point 6 of the WhatsApp messages, including the approach discussed in the call. Our recommendation is for the other points to be separate projects, giving the initial chatbot and lead generation features the priority.

To ensure we meet time requirements, the quote has a three month and two month option. The work and quality of work produced will be the same for both.

Two Options

Three Month Project

Setup / Initial Fee: \$3000

Month 1: \$2000

Month 2: \$2000

Month 3: \$2000

Total: \$9000

Two Month Project

Setup / Initial Fee: \$3000

Month 1: \$3250

Month 2: \$3250

Total: \$9500

This price for both options includes all development, testing, support and on-going dialogue that will be required to ensure the best solution possible is created.

Approach and Technology

To replicate all of customGPTs features, and ensure we have all current OpenAI features available to us, this will be built of the latest Assistants API from OpenAI (not the Completions API, which is more limited). Assistants API offers the opportunity to build the most flexible and feature-rich chatbot system available today.

Our approach is a transparent and honest one. Our aim is to give you the best chatbot and fetures that provide the ideal solution for your business. Lead generation is one of the key assests of any chatbot, and we will ensure this is considered at each stage,
